North Devon and Somerset Coastal Advisory Group (NDASCAG)

Shoreline Management Plan Review (SMP2) Hartland Point to Anchor Head

Appendix M – Action Plan Summary Table

The Supporting Appendices

These appendices and the accompanying documents provide all of the information required to support the Shoreline Management Plan. This is to ensure that there is clarity in the decision-making process and that the rationale behind the policies being promoted is both transparent and auditable. The appendices are:

| A: SMP Development | This reports the history of development of the SMP, describing more fully the plan and policy decision-making process. |
|--|--|
| B: Stakeholder Engagement | All communications from the stakeholder process are provided here, together with information arising from the consultation process. |
| C: Baseline Process Understanding | Includes baseline process report, defence assessment, NAI and WPM assessments and summarises data used in assessments. |
| D: SEA Environmental Baseline Report (Theme Review) | This report identifies and evaluates the environmental features (human, natural, historical and landscape). |
| E: Issues & Objectives Evaluation | Provides information on the issues and objectives identified as part of the Plan development, including appraisal of their importance. |
| F: Initial Policy Appraisal & Scenario Development | Presents the consideration of generic policy options for each frontage, identifying possible acceptable policies, and their combination into 'scenarios' for testing. Also presents the appraisal of impacts upon shoreline evolution and the appraisal of objective achievement. |
| G: Preferred Policy Scenario Testing | Presents the policy assessment and appraisal of objective achievement towards definition of the Preferred Plan (as presented in the Shoreline Management Plan document). |
| H: Economic Appraisal and Sensitivity Testing | Presents the economic analysis undertaken in support of the Preferred Plan. |
| l: Strategic Environmental Assessment (SEA) Report | Presents the various items undertaken in developing the Plan that specifically relate to the requirements of the EU Council Directive 2001/42/EC (the Strategic Environmental Assessment Directive), such that all of this information is readily accessible in one document. |
| J: Appropriate Assessment Report | Presents the Appropriate Assessment of SMP policies upon European designated sites (SPAs and SACs) as well as Ramsar sites, where policies might have a likely significant effect upon these sites. This is carried out in accordance with the Conservation (Natural Habitats, &c.) Regulations 1994 (the Habitats Regulations). |
| K: Water Framework Development Report | Presents assessment of potential impacts of SMP policies upon coastal and estuarine water bodies, in accordance with the requirements of EU Council Directive 2000/60/EC (the Water Framework Directive). |
| L: Metadatabase and Bibliographic database | All supporting information used to develop the SMP is referenced for future examination and retrieval. |
| M: Action Plan Summary Table | Presents the Action Plan items included in Section 6 of the main SMP document (The Plan) in tabular format for ease of monitoring and reporting action plan progress. |

Within each appendix cross-referencing highlights the documents where related appraisals are presented. The broad relationships between the appendices are illustrated below.

Table of Contents

| M.I | INTRODUCTIONI |
|-----|--------------------|
| M.2 | ACTION PLAN TABLES |

M.I Introduction

This appendix contains the detailed Action Plan tables in the format that provides information in a consistent way nationally such that it is readily available in a form to monitor and plan in financial terms, the requirements for flood and coastal risk management in England and Wales on an annual basis.

The information in these tables is the same as presented in summary form in Section 6 of the main SMP document. It is merely presented in a different way for the reasons stated above.
